

FACULTY OF ENGINEERING Final Year Project 2

Supervisor's Evaluation

Student Name	:	
Matric No.	:	Programme:
Supervisor	:	
Project Title	:	

Instruction: Please rate your student according to the marking criteria below. Fill in column "MARKS' for each criteria with 0/1/2/3/4 (Marks in decimal point is not allowed).

Criteria	CO/PO	Marking Criteria						Mark	Total Marks (n*w)
		n = 0	n = 1	n = 2	n = 3	n = 4	Weightage w		Tot
Project and design Significance (CH1)	CO3/ PO4	Problem, aim and objectives were not identified and presented	Problem not clearly identified/inacc urate and explanation is too brief, aim and objectives were vague and not addressing forefront indepth engineering problem	Problem was identified and addressed in a satisfactory manner, aim and objectives were stated and presented forefront in-depth engineering problem in a satisfactory manner	Problem was identified and addressed in a good manner, aim and objectives were stated and presented forefront in-depth engineering problem in a good manner	Problem was clearly addressed, aim and objectives were clearly stated and strongly presented forefront in-depth complex engineering problem	2.5		
Literature review on design and solution (s) (CH2)	CO1/ PO2	Poorly structured review of literature without citation of references or no review of literature at all	The review of literature was not structured in a clear order, and most citation of references was not done properly.	The review of literature was sufficiently structured in a clear order, and some citation of references was not done properly.	The review of literature was structured in a clear order; however, some citation of references was done properly.	The review of literature was structured in a clear order, and citation of references was done critically.	3		
Research gap on design and solution (s) (CH2)	CO3/ PO4	No research gap and problem statement identified from the literature review.	Unclear research gap and problem statement identified from the literature review.	Research gap and problem statement were fairly identified from the literature review.	Research gap and problem statement were satisfactorily identified from the literature review.	Research gap and problem statement were clearly identified from the literature review.	2.5		
References (CH2)	CO1/ PO2	All references were not reliable (100% internet content)	75% of references were not reliable (e.g internet content) and relevant	50% references were not reliable (e.g internet content) and relevant	75% references were apparently reliable (e.g journals), relevant and updated	100% references were reliable (e.g journals), relevant and updated	2		
Investigatio n of project design (CH3)	CO2/ PO3	No conduct of study methods/ parameters were provided	Some conduct of study methods/ parameters were not outlined and/or without any justifications provided	Conduct of study methods/ parameters were fairly outlined and justified.	Conduct of study methods/ parameters were satisfactorily outlined and justified	Conduct of study methods/ parameters were clearly outlined and justified.	5		

There was no outcome of course and produced were not meeting the project is objectives. Outcomes are produced were not meeting the project is objectives, supported with a dark of product. No data analysis included property in the project is objectives, supported with convincing data/ data have not been interpreted using appropriate techniques) (§ e.g. statistical analysis) both tack in the report was parpropriate techniques) (§ e.g. statistical analysis) both tack in the relevant theory for experimental/simulation/ modelling data/ (Crital) No validation of result.
